CIMBALI COFFEE HIGH PERFORMANCE

LA CIMBALI

M29 Select : Comfort & Stability

The M29 is a well-known, machine all over the world for its simplicity, ease of use and its extraordinary reliability.

The Cimballi has a microprocessor that allows the operator to change the doses of coffee and hot water in a very simple way. The M29 is highly appreciated for the quality of the result in the cup.

The thermal stability required to obtain a perfect espresso is guaranteed by a heat exchanger, a specific element of Cimballi coffee machines. An electronic filling system guarantees the level optimum of water in the boiler.

In addition, the economizer mixes hot water from the boiler with the cold water system, avoiding temperature differences and allowing considerable energy savings.

M29 Select

Boiler Capacity : 5 liters

Standard Dimensions [WxDxH] : 57 x 51 x 48 cm

Weight : 56 kg

Max Power at 220 - 240V

~ 50Hz (W) : 3 200 - 3 700
